The Hand-Held Vein Finding Device

Simplifying Vein Access

VeinSpy™

The Hand-Held Vein Finding Device

Working Principle of the VeinSpy™

The **VeinSpy™** works on Transverse Illumination Technology. In **VeinSpy™** light beams from a circular LED array penetrates the skin, which are directed below & focused centrally. This acts as a fundamental light source to achieve identical illumination of subcutaneous tissues. The veins which are present in the illuminated area absorbs the light & becomes prominent as dark lines. The **VeinSpy™** device consist of two sets of colored LEDs, one set emits Orange light & another set emits Red light. The Orange light is optimal for superficial veins where as the Red light is for viewing deeper veins.

Application of the VeinSpy™

- Easy visualization of veins in Adult Pediatric & Geriatrics patients with difficult venous access.
- Clear visualization of veins for obese & dark skin patient.
- Clear visualization of veins before starting of IV therapy.

Advantages of the VeinSpy™

- Reduce multiple needle prick & improves site selection for needle insertion.
- No treatment delay due to difficult venous access.
- Reduce patient pain due to needle insertion in muscle/tingling sensation due to hitting of needle in nerve.
- Increase patient comfort & satisfaction. Avoids hematoma.

Ordering Information :

Sr. No.	Product Name	Cat No.
01	VeinSpy™	825VS000000
02	Disposable Plastic Sleeves	825DS5000050
03	Injecta™ (General purpose antiseptic solution)	IJT 0200

How to Use VeinSpy™

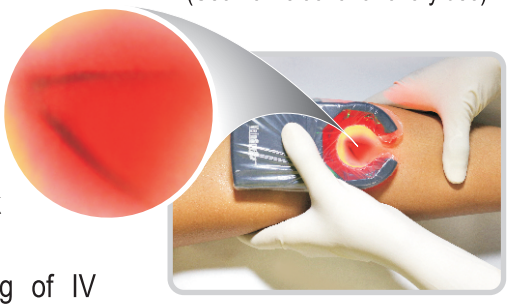

Wipe the area of the Patient's Skin with Alcohol swab or preferably with Injecta™.
(General purpose antiseptic solution)

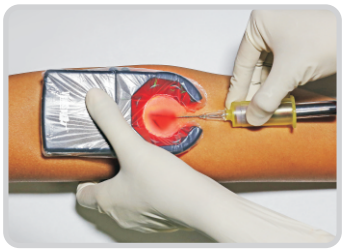

Insert VeinSpy™ into the disposable sleeve & switch ON. (Use new sleeve for every use)

Move the VeinSpy™ across & forth to get a clear view of the specific vein.

After visualization of vein move the device so that needle can be inserted easily.

Gently press the VeinSpy™ on the vein, through the open end of VeinSpy™ insert needle into the vein.

Technical Specification	
Number of LED's	22 Orange, 8 Red
Power ON	Indication by Green LED
Low power	Indication by Red LED
Functional opening	17mm
Viewing diameter	33mm
Rechargeable Battery	Lithium Ion, 3.7V, 1150mAh
Battery Charger	110-240 volts AC input, 5V DC output 750mA
Battery Backup	1½ hrs. Continuous usage
Dimensions	L 125 mm; B 65 mm; H 22.7 mm
Weight	90 gms
